SECURITY CONSULTING & MANAGED SERVICES

We help startups, SMBs, and growing enterprises reduce cyber risk with practical consulting engagements and ongoing managed security support. Our approach is outcome-driven: clear scope, measurable improvements, and executive-friendly reporting.

WHAT YOU CAN EXPECT

- Clear deliverables and timelines
- Risk-based prioritization (what to fix first)
- Governance + compliance alignment
- Ongoing monitoring and response support

CONSULTING (PROJECT-BASED)

- VAPT (web, API, network) with validated findings
- Cloud security review (AWS/Azure/GCP baselines)
- IAM/PAM advisory (JML, SSO/MFA, access reviews)
- Compliance readiness (ISO 27001 / DPDP support)
- Incident readiness: IR plans, playbooks, tabletop drills

MANAGED SECURITY SERVICES (MSSP)

- Log monitoring + alert triage (24x7 options)
- Threat detection tuning and use-case development
- Vulnerability management and patch prioritization
- Incident response support and escalation on-call
- Monthly security reporting (risk, trends, priorities)
- Security hygiene: backup checks, hardening, baselines

ENGAGEMENT MODELS

- One-time engagement: fixed scope and deliverables (typically 2–8 weeks)
- Monthly retainer: continuous security support with defined SLAs and reporting
- Hybrid: project kickoff followed by managed security operations

AI INFRASTRUCTURE & SECURITY

- Secure AI stack design (data, model, apps, infra)
- LLM / GenAI risk controls: prompt injection, data leakage
- AI governance: policies, access control, audit trails
- Secure MLOps: supply-chain, CI/CD, secrets management
- Cloud GPU / container security + runtime monitoring
- Security testing for AI apps and APIs

TRAINING & CAPABILITY BUILDING

Alongside consulting and managed services, we run hands-on training programs for teams and professionals. This helps organizations build internal capability and reduce long-term dependency.

CORPORATE TRAINING (TEAMS)

- Role-based training: SOC, IR, IAM, GRC, cloud security
- Workshops: incident tabletop exercises, phishing drills
- Policy and process enablement for compliance programs
- Custom labs aligned to your tools and environment

PROFESSIONAL PROGRAMS

- IAM Foundation to Advanced (Wiseman designed)
- DFIR (Digital Forensics & Incident Response)
- DPO / DPDP readiness, ISO 27001 Lead Auditor
- CISSP / CISM mentoring (exam + job guidance)

WHY CLIENTS CHOOSE WISEMAN

- Practical, implementable recommendations – not just reports
- Clear documentation: scope, evidence, measurable outcomes
- Business-first security: align controls with real constraints and priorities
- Continuous improvement mindset: roadmap + follow-through

Disclaimer: Service scope and timelines depend on requirements, environment access, and agreed deliverables. Product/tool names may be referenced only for compatibility; we do not claim affiliation unless explicitly stated.
